

LOGNOTE - FBIS Administrative Staff, FBIS, 13 November 1980

[redacted] I met with [redacted] Chief, Psychiatric Division, OMS to discuss how the selection process for overseas assignment of FBIS personnel could be refined/improved. Psychiatric examination of family members is not part of the SOP for overseas processing unless there is some pre-existing reason for it. I explained to [redacted] that FBIS was looking into the possibility of ~~working~~ *MAKING* interviews for family members a part of the processing routine in response to a recommendation from a recent IG survey. [redacted] said that such examinations could not guarantee that potential problems would be surfaced but thought that such a program was a good idea and could be established. To get things moving, we must send a memo to D/OMS from D/FBIS requesting that such a program be established.
